

November 2015 Website Use

The chart below summarizes the use and shows that during November, we had just over 727 visits, about 250 of whom were returning visitors. On the average, each visit was to about two pages, although almost 77 per cent involved only one (as shown by the bounce rate). Just over half of our users are from the U.S., although some of the 16 per cent whose countries are not known are probably also from here. Substantially more people looked at the site this month (506 compared to 197 in October).

The chart below shows the number of users who've accessed the site within the last day, the last week, and the last two weeks. (I didn't plot the number who we hadn't seen for a month.) A substantial number of people check our site on a regular basis. The number of returning viewers also increased this month; we had over 350 visits from people who view the site more often than once every two weeks vs. just over 100 from such folks last month.
